WHOLE HOUSE

111 Pine Ave., Colorado Springs, 80906

BEFORE

AFTER

DA JOHNSON

Project Description

This project was a whole house remodel with room additions.

Newly designed kitchen, with Silestone countertops, undermount sink, rustic Alder full overlay raised panel style cabinets, with new lighting.

Also, a new bathroom was produced off the kitchen.

A new entryway with closet, new window, and tile floor was added.

The back of the house was extended creating a sunroom and office/bedroom. We also added a sitting area adjacent to the master suite, which was re-designed with a walk-in closet and privacy doors.

There were new doors and trim replaced throughout the home, as well as new paint. Also installed, was hardwood flooring in the dining room, kitchen, and family room, tile in the sunroom, and new carpet in the office/bedroom.

New 50 year roof was put on. A new driveway was poured. Gutters replaced,

and an extended garage was built. Amsco vinyl windows and a Pella Patio door installed in the sunroom. We also upgraded the electrical panel.

We finished the addition with new stucco.
